

Museum for Art in Wood

Specification on the exhibition gallery *Updated June 2018*

- Total gallery area is approximately 2,200 square feet.
- The gallery is at street level. Delivery doors can accommodate large boxes and crates, but there is no raised loading dock. Doorway dimensions are 11' height x 9' wide
- Gallery includes four moveable walls, each 10' height x 10' length x 20" width
- A wide screen panel on the title wall can display videos and slide shows from a flashdrive. A smaller video panel and iPADS are available as well.
- An overhead projector is also available for videos
- Gallery walls are sheetrock with plywood backing
- Artwork can be suspended from steel rods in the ceiling. The rods run lengthwise over the gallery and are positioned approximately 6' apart. Distance from floor to ceiling is 17'
- The Museum owns a 25' extension ladder, 6' aluminum step ladder, and a small stepladder
- An updated inventory of pedestals and platforms and floorplan is available on request
- Gallery windows are 9' x 64" wide with the exception of two 41 ½ " windows. At this time, two side windows are UV-filtered and plans are underway to add UV filters to the remaining windows.
- LED track lighting system.
- Two security cameras in gallery
